360° Camera systems - Ref. BRI.S5201

360°

360° vision solution (12/24 Vdc) for bus and coach is composed of cameras, a central unit and a remote control. The four cameras create an image on a screen for the driver and the possibility to delate blind spot that's supporting the security of the passenger vehicles and reduces collisions with people and objects. This solution is compliant to R10 04 EMC (electromagnetic compatibility) regulation.

TECHNICAL CHARACTERISTICS

Product Type	HD 360° wired
Voltage	12/24 V
Housing Material	Aluminium
Length	174 mm
Width	101 mm
Depth	30 mm
Max Cameras	4 cameras max
EMC	ECE R10-04
Industry	Buses and Coaches, Trucks
